

Concrete Overlay Color Chart

Integral and Water Based Stain Colors

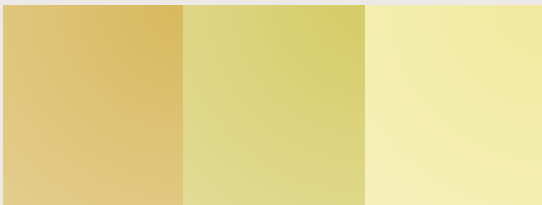

Chocolate

Charcoal

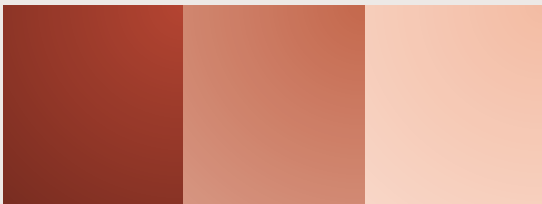

Palomino

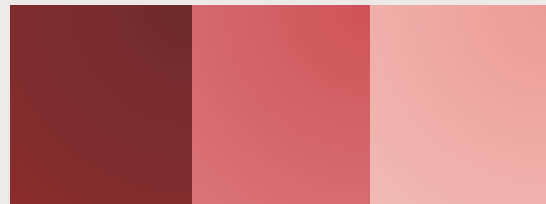

Desert Beige

Terra Cotta

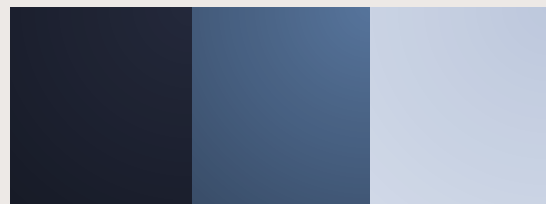

Brick Red

Forest Green

Graphite

Colors are approximate, and should not be used for specification purposes. Physical samples should always be viewed and approved prior to starting your project. When applied as topical stains, these colors produce an uneven, antique look. As integral colors, they create a monolithic appearance. The texture of the surface you choose will also effect the look of these colors. No concrete coloring process is totally uniform. Please view our other charts for more design options.
